APPLICANT: SUTCLIFFE, J. GERGOR
TITLE OF INVENTION: SYNTHETIC POLYPEPTIDES CORRESPONDING
TITLE OF INVENTION: SYNTHETIC POLYPEPTIDES CORRESPONDING
FOR PORTIONS OF PROTEINOIDS TRANSLATED FROM BRAIN-SPECIFIC MENAS,
RECEPPORS, METHODS AND DIAGNOSTICS USING THE SAME
NUMBER OF SEQUENCES: 19
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     CURRENT APPLICATION DATA:
